DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/10/2004 has been entered.

REASON FOR ALLOWANCE

- 2. Claims 1-3,5,7-17,19-20,23-29,31-32 is allowed. Claims 4,6,18,21,22,30 have been cancelled.
- 3. The following is an examiner's statement of reason for allowance:

The prior art fails to teach or suggest an electronic device having a user interface to coupled to the processor and configurable to have a selected orientation about at least a first axis, the user interface includes a display assembly and the plurality of input features, each of the display assembly and the plurality if input features are formed using a layer of contact sensitive material and the processor combines with the user interface to detect a contact initiated by the user to either of the display assembly and any of plurality of input features; a detection mechanism to detect orientation information about the electronic device; the processor is configured to identify the orientation of the user interface based on the detected orientation and the contact to any

of the plurality of input features and display assembly is interpreted based at least in part on the identified orientation as claimed in claims 1,29.

The prior art fails to teach or suggest a method for configuring an electronic device identifying an orientation for a user interface based on an orientation of how the electronic device is held, the user interface includes a plurality of input features and a display assembly and the plurality of input features and the display assembly are formed from a layer of contact sensitive material; configuring at least a portion of the user interface according to the identified orientation and the step of configuring at least the portion of the user interface includes interpreting contact made to any of the plurality of input features and the display assembly based at least in part on the identified orientation as claimed in claim 16.

The prior art fails to teach or suggest a set of contact sensitive regions disposed symmetrically about one or more axes, the set of contact sensitive region being configurable to have a selected orientation based on a reference indication on the one or more axes and a detection mechanism to detect orientation of the electronic device in use and one or more components configured to automatically determine the reference indication and to select the orientation of the set of regions based on the determined reference indication as claimed din claim 31.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
